Continuation Sheet (PTOL-303)

Application No. 009/201,484

Continuation of 2. NOTE: The requested amendments to independent claims 1, 17, 31, and 32 introduce new limitations that would require further search and consideration..

Continuation of 5. does NOT place the application in condition for allowance because: The applicant's arguments directed to independent claims 25 and 28 are not persuasive.

The applicant argues that Hoarty fails to teach or suggest a "proxy server... translating the received control data into control data representing a video control action in the second control protocol," as recited in claim 25; simarily recited in claim 28 as "translating the received control data into control data representing a video control action in a second videoon-demand server control protocol." The examiner disagrees. Control data is given the broadest reasonable interpretation in the art, of control data including control commands along with the address information. Since Hoarty teaches changing the addressing scheme between an IP and IHOP, Hoarty teaches translatting the received control data (where the control data includes address information along with control commands).
